Industry's First Professional Portable Lighting LED Brand

Both NiteLab and NITECORE belong to SYSMAX which is dedicated to exploring LED technology to reinvent the portable lighting LED solutions.

UHE LED

Ultra High Efficiency

UHE, short for Ultra High Efficiency, represents NiteLab's pioneering development in LEDs and is specifically designed for high performance gear such as headlamps. It delivers enhanced efficiency per watt, offering a brighter, more energy-efficient, and long-lasting lighting experience.

LED New Benchmark

NiteLab cooperated with an industrial partner to jointly develop the UHi LED Series, specially designed for portable lighting. Featuring high light density and ultra high beam intensity, the UHi LED utilizes the round light emitting surface (LES) to achieve an optimal lighting effect and beam distance, which challenges the impossible and begins a new era.

MCT LIGHTING SYSTEM

(Variable CRI Multiple Color Temperatures)

The MCT (Variable CRI Multiple Color Temperatures) Lighting System combines NiteLab's self-developed MCT UHE LEDs with NITECORE's multi-faceted optical lens system, effectively integrating light sources of different color temperatures and CRI levels into a single, fully blended beam, delivering high CRI, multiple color temperatures, high efficiency, soft lighting, and long-range performance.

Ultraviolet

The UV light has shorter wavelengths than visible light, and is also known as black light. Ultraviolet LED flashlights are useful in many applications, including identifying forged documents, tracing marked bills, leakage/grease inspection, sanitary check, hunting scorpions etc.

Rapid Lock™ Lockout Switch

Full Lock / Half Lock / Unlock With One Slide

NITECORE Models: EDC23, EDC29, EDC31, EDC35, EDC37

LUMIN SHIELD®

LUMIN SHIELD®, specially designed by NITECORE, enables an instant defense with a blazing output thanks to a multi-core UHi MAX LED. This technology is engineered to provide an unprecedented wide-area protective coverage, resembling a shield.

NITECORE Models: EDC29, EDC31, EDC35, EDC37, EX7

STROBE READY™

In law enforcement, the strobe flashlight for self-defense is used on potential suspects who may present a danger but are not lethally armed. The strobe light is disorienting to the person it is aimed at, which makes it difficult for them to concentrate. Also, they avert their eyes away from the strobing effect. This means it is easier for the police to subdue successfully and control the suspect.

The 2nd Generation STROBE READY™ Technology is specially designed by NITECORE for tactical applications to enable a quick access to STROBE Mode with the dual tail switches and the inset pedal design to avoid accidental activation.

2nd Generation STROBE READY™ Technology

Infrared

The IR light is with wavelengths longer than those of visible light. Extensive uses for military and civilian applications include target acquisition, surveillance, night vision, homing, and tracking.

NITECORE Models: CI7, NU06 MI

With advanced technologies and technical personnel, NITECORE has been keeping innovating over the years and has harvested over one hundred invention patents and utility model patents.

QUALITY ASSURANCE

NITECORE products combine advanced technology with precise design, undergo rigorous testing, and meet industry standards to deliver exceptional performance.

Luminous Flux Testing

NITECORE uses integrating spheres to accurately evaluate data such as luminous flux and color temperature.

Button Life Testing

NITECORE uses a button life testing machine to determine the buttons' durability and the compressive strength of the internal structure.

High and Low Temperature Testing

NITECORE uses a constant temperature and humidity test chamber to test the product performance in extreme temperature and humidity.

Aging Testing

NITECORE adjusts the product to its highest output and test its reliability by simulating long-term use conditions to ensure quality before shipment.

Battery Safety Testing

Rigorous tests are carried out on the battery, as well as to check the performance and lifespan of the battery in extreme environments.

WHEN THERE IS DARKNESS THERE IS A NITECORE LIGHT

NU Series

NITECORE NU Series headlamps are lightweight and powered by built-in Li-ion batteries. They feature a uniform wide beam, powerful output for versatile outdoor adventures. The MCT (Multiple Color Temperatures) UHE LEDs allow users to switch between cool white, neutral white, and warm light to adapt to different environments. Crafted from durable PC materials, the NU Series is purpose-designed for trail running, trekking, hiking, camping, and more.

UT Series

The UT Series is specially designed and optimized for trail runners in nighttime or in rain, snow or fog. Compared to marathons, trail races usually feature a longer distance, a steeper gradient and a longer duration with higher requirements on personal equipment, among which is the mandatory lighting gear.

Lantern Series

NITECORE Lantern series products are professionally designed for camping. With a CRI rating ≥ 90 , the lanterns emit a beam that is closer to natural daylight to avoid eye fatigue and reveal subtle details of objects. A single switch controls all brightness levels and modes, ideal for camping, excursion, working at night, night photography, everyday carry and so on.

Mosquito Protection

EMR Series

With the innovative heating system and safe activating method, the NITECORE EMR Series is specially designed for outdoor enthusiasts to repel mosquitoes or pests effectively. The EMR Series products are powered by the rechargeable Li-ion battery, minimizing the carbon footprint while providing users with a long-lasting protection zone.

There is a need to carry and replace fuel, which is high consumption, not eco-friendly, and unapproved by airlines.

FCB 3.0 Heating System

(Utility Model Patent No. ZL2022225158067)

Peak Heating Area Temperature:
Approx. 180°C / 356°F

Ultrasonic Function

Ideal for repelling pests, such mice, snakes, cockroaches, and skunks.

16ft MAX Protection Zone
